SUMMARY

Frontend engineer and team lead with **7 years** shipping production web apps for government, banking, fintech, and e-commerce in Egypt and Saudi Arabia. Design-systems specialist: core engineer on the **Saudi National Design System (DGA)** and the **AI Rajhi Group design system** — Stencil.js component libraries with React and Angular output targets and token pipelines, consumed across national-scale government and banking platforms. Comfortable across the stack (Node.js/NestJS, PostgreSQL, Docker, Kubernetes, CI/CD): I own products end to end as a technical partner, and lead backend and DevOps engineers with credibility. Daily AI-assisted engineering (Claude Code, Cursor, custom agents and MCP tooling) to ship faster without lowering the bar. Arabic/English bilingual with deep RTL and localization experience.

EXPERIENCE

Senior Frontend Engineer · AZM X

Dec 2025 – Sep 2026 · Riyadh, Saudi Arabia (Remote)

- Core engineer on the **AI Rajhi Group design system (ARG GDS)** — 160+ Stencil.js web components with React and Angular output targets, and a style-dictionary token pipeline theming six brands (AI Rajhi Bank, AI Rajhi Capital, Emkan, Neoleap, Takaful, urpay).
- Returned to the **Saudi National Design System (DGA)**: shipped component updates across the 147-component Stencil library and its Storybook, plus the React documentation site (AR/EN, RTL).
- Built the **Screening module** for **Colab**, a multi-tenant user-research platform (Next.js 16): screener form builder, participant screening flow via unique links, shortlisting with scheduling status, and the Session Calendar — pixel-matched to Figma, with Storybook 9 a11y and visual-regression tests.

Team Lead · Senior Frontend Engineer · ProBuy

Oct 2024 – Nov 2025

- Promoted after six months to lead the full development team (frontend, backend, QA, DevOps) of a Riyadh fintech platform, owning technical direction and cross-discipline delivery.
- Architected and shipped the admin portal — advanced configuration, analytics, and role-based access control, fully integrated with backend APIs.
- Built a reusable **checkout-workflow npm package**, cutting integration time across projects by ~60%.
- Developed the Next.js marketing site with SSR and SEO optimization.
- Deployed and maintained environments on Azure and Alibaba Cloud (Kubernetes) with Docker and CI/CD pipelines.
- Authored the integration documentation portal with live examples and API references, cutting partner support requests by over 40%.
- Raised code quality and release stability through mentoring, code review, and agile practices.

Senior Frontend Engineer · AZM X

Nov 2023 – Sep 2024 · Riyadh, Saudi Arabia (Remote)

- Built the **Saudi National Design System (DGA)** with the core team — a large-scale component library standardizing UI/UX across Saudi government platforms.
- Introduced Stencil.js for framework-agnostic web components with React output targets, giving consumer teams a single source of truth.
- Led technical implementation of the component library; delivered three weeks ahead of schedule.
- Integrated Storybook (70+ stories) for visual documentation, accelerating QA and design review cycles.
- Built the documentation site — usage, code, and style-spec pages for 98 components, bilingual AR/EN with RTL — cutting developer onboarding from two weeks to three days.

Senior Frontend Engineer · Dafater

Aug 2021 – Oct 2023

- Led frontend development for three large-scale enterprise applications in Vue 3, from requirements through deployment.
- Integrated the **Payfort payment gateway** with robust error handling, real-time status updates, and secure transaction logging.
- Built enterprise authentication on **Azure AD B2C** — SSO, MFA, and role-based access control.
- Designed a responsive HTML email system rendering pixel-perfect across 15+ clients.
- Partnered with backend and product teams on API design and data flow.

Frontend Developer · EG Coder

Aug 2019 – Jun 2021

- Built and launched WordPress sites with responsive designs and custom PHP.
- Developed an Angular application for coworking-space management.
- Integrated the Hyperpay payment gateway into a React Native app.

Technical Partner & Product Engineer · independent, alongside full-time roles

Jun 2021 – Present · case studies at mon3m.vercel.app

- **Dar Ahlullah Quran Academy** (dar-ahlullah.com) — technical partner; built and own the full LMS: Zoom-integrated live sessions, teacher scheduling, homework, progress and evaluation tracking, session reports, bilingual AR/EN. TurboRepo + pnpm monorepo (Astro, React/Vite, NestJS/Prisma/PostgreSQL) with GitHub Actions, Docker and NGINX across dev/staging/prod. Own SEO and analytics; leading the V2 rebuild.
- **Bunyan Makkah** (real estate, Cairo) — built **Taskeen** (taskeen.bunyan-makkah.com), a Next.js 16 + Prisma housing platform with marketing site, resident portal and RBAC admin, self-hosted on Docker + Caddy; architected **Bonyan ERP**, a multi-tenant NestJS (DDD, schema-per-tenant) + React ERP for developers, in pilot; co-building **Bunyan CRM**, an AI-assisted lead CRM on NestJS, BullMQ/Redis and the WhatsApp Cloud API.
- **MyEx** (my-ex.app) — core contributor on the Next.js 15 / React 19 web app with 21-locales i18n and Storybook; built the Academy module including its .NET backend; own SEO and GTM conversion tracking.
- **Hugaira** — solo-built e-commerce TurboRepo monorepo: Next.js storefront, React admin, NestJS/Prisma API, Expo mobile app, Paymob checkout, Playwright E2E; plus **EStore Factory**, an Electron app that generates branded stores from it as Docker images.
- Earlier client work: **GoldenBlood** (React, German healthcare client, 95+ PageSpeed), **Bluepages** (Next.js directory), 20+ React Native screens for apps rated 4.5+. Founder of **Jozour** (jozour.store), a perfume brand with its own online store.

SKILLS

Frontend: React, Next.js, Vue 3, Angular, Stencil.js, React Native, TypeScript, JavaScript, Tailwind, SCSS

Design Systems: Component library architecture, Design tokens (style-dictionary), Storybook, Multi-brand theming, i18next, RTL & bilingual AR/EN

Backend: Node.js, NestJS, Express, Prisma, PostgreSQL, MongoDB, REST APIs

Architecture & Tooling: TurboRepo + pnpm monorepos, DDD, Docker, GitHub Actions CI/CD, Playwright, Azure, Alibaba Cloud (K8s), NGINX

AI-Assisted Engineering: Claude Code, Cursor, agentic workflows (custom agents, skills, MCP servers), AI-driven code review, test generation, and documentation

Leadership: Team leadership, Code review, Mentoring, Agile delivery, Technical planning
